Test Engineer (m/f/d)

Temporär Jobregion: Rotkreuz Stellenprozente: 100%

Beschreibung

As a first-tier supplier to our renowned business partner **Roche Diagnostics in Rotkreuz**, we are currently looking for a motivated and dedicated **Test Engineer** for a temporary assignment of 1 year, with high probability of extension.

Tasks & Responsibilities

- You write clear, comprehensive test cases and technical requirements based on system specifications and stakeholder input.
- You execute hands-on test cases and complex test sets (including calibration phases) directly on hardware components, pre-analytic instruments, manual output modules, and lab transport interfaces.
- You analyze and report test results, meticulously documenting defects, tracking issues, and verifying fixes.
- You collaborate closely with hardware developers and cross-functional teams to align on component behavior, investigate root causes, and resolve instrument-level issues.
- You distinguish between actual hardware defects and operational misuse, uncovering edge cases that may not yet be captured in formal specifications.
- You support the setup and maintenance of compliant test environments and equipment while contributing to continuous process and quality improvements

Must-Haves

- You bring a Bachelor’s or Master’s degree in a related engineering/technical field, or an equivalent completed technical education.
- You have at least 1 year of relevant hands-on experience (including internships) in hardware component testing, instrument testing, or hardware development.
- You possess a strong "mechanical engineer mindset", an intuitive understanding of how mechanical and hardware parts interact, whether gained in MedTech, Pharma, Automotive, or Aviation.
- You have experience working within highly regulated environments (such as GMP, ISO, automotive, or aerospace standards).
- You bring strong analytical skills to interpret complex test results, identify edge cases beyond written specs, and work reliably under strict timelines.
- You are fluent in English (written and spoken) and bring a collaborative, flexible team-player attitude ready to navigate frequent changes in test setups.

Nice-to-Have

- You bring a multidisciplinary academic or professional background combining mechanical/product design with data or digital engineering (e.g., Data Science, Digital Engineering, or Industrial & Product Design).
- You have experience using data science or quality metrics to spot trends and identify improvement opportunities in verification results.
- You are familiar with diagnostic instruments, pre-analytic systems, lab automation/transport connections, or calibration testing.
- You speak German in addition to English.

Benefits

- Become part of one of the most prestigious pharmaceutical companies and actively shape the future of healthcare
- Experience a work culture that promotes diversity and inclusion and where all employees feel valued
- Work on a state-of-the-art campus featuring green spaces, meeting areas, and an inspiring atmosphere
- Work with modern and up-to-date tools in an innovative work environment
- Start with a professional onboarding process and a thorough introduction to your new role during the Welcome Days
- Benefit from financial support for your professional development plans
- Enjoy a selection of high-quality meals in modern staff restaurants
- As part of a sustainable mobility concept, on-site parking spaces are available to you
- Take advantage of unbeatable, year-round discounts at renowned retailers and over 200 top brands
- Benefit from fleet discounts when purchasing new cars or receive constant fuel discounts
