Associate in Drug Delivery and Pre Formulation Sciences (m/f/d)

Temporär Jobregion: Basel Stellenprozente: 100%

Beschreibung

As a first-tier supplier to our renowned business partner F. Hoffmann-La Roche Ltd. in Basel, we are currently looking for a motivated and dedicated **Associate in Drug Delivery and Pre Formulation Sciences** for a temporary assignment of 6 months.

his position is located in preclinical Chemistry, Manufacturing, and Controls, a department within the Small Molecule Research organization in Therapeutic Modalities . We pave the path to bring drug candidates from early research into development in a diverse, ambitious and innovative environment. We collaborate actively with our discovery and development partners' functions providing cutting-edge technologies and scientific excellence to transform molecules into future medicines. We are CMC (Chemistry; Manufacturing; Controls) experts and build our strength on a broad diversity of technical expertise in chemistry, formulation design, material science and analytical chemistry, delivering and innovating in the space of small molecules, peptides and nucleic acid-based medicines.
We are offering a unique opportunity to join our team in the Roche Innovation Center Basel as Senior Associate in the Preformulation and drug delivery team dedicated to assess the developability of drug candidates, develop preclinical formulations to advance our portfolio through successful development of viable molecules into medicines.

Tasks & Responsibilities

- As a (pre-)formulation associate, you work with the preformulation project leader to plan and execute lab experiments for physico-chemical characterization of drug molecules, assessing their potential as medicines.
- You develop formulation concepts for pre-clinical studies across various administration routes in alignment with the respective scientist and perform formulation supplies and their analytical assessments independently.
- As a lab owner you are responsible for keeping the respective equipment operational, you organize maintenance services and follow all Roche guidelines and principles regarding Safety, Health and Environment.
- You use state of the art digital laboratory tools like electronic laboratory notebook and centralized data storage and contribute to the advancement and implementation of innovative digital solutions and automation workflows to enhance our operational efficiency and

effectiveness.

Must Haves

- A successful apprenticeship, bachelor or master in Pharmaceutics, Pharmaceutical Technology, Biopharmaceutics or similar field (PhD overqualified)
- 3–5 years of work experience in a laboratory environment; candidates with more extensive experience are also very welcome.
- Relevant experience in Pre Preformulation is required
- A sound understanding of the drug development process and expertise in designing, developing, and analyzing (preclinical) formulations using key scientific methods.
- Fluency in either English or German, with a minimum B1 level in the other language.
- Creative thinking. You are curious and passionate about scientific and technical innovation. You can quickly learn and adapt your thinking to complex and evolving environments.

Nice to Have

- Previous Roche experience

Benefits

- Work with modern and up-to-date tools in an innovative work environment
