

Data Hub Engineer (m/f/d)

Temporär Jobregion: Rotkreuz Stellenprozent: 100%

Beschreibung

For our international medical partner, **Roche Diagnostics Int Ltd** based in Rotkreuz, we are looking for a qualified and motivated **Data Hub Engineer** for a long term position.

Roche's sub-department is enabling the organization to connect their instruments and services with each other and to utilize the data in different applications to provide data insights to customers. The responsibility is on one hand to ensure the data distribution and the data privacy aspects, on the other hand to store and provision the data.

Tasks

- Technical lead for software development tasks or projects in teams.
- Independent delivery of complex, broadly defined software assignments. Specification, planning, implementation, testing and documentation of these assignments and drafting/ definition of tasks for others.
- Independent planning and implementation of complex internal and external sub-projects by involving several employees, or responsible for an area of technological activity.
- Executes with high accountability to schedule and quality.
- Participates actively in detailed design, code reviews, bug/issue triage, and supports well informed decisions towards business and engineering goals.
- Review expert for other project groups.
- Internal and external knowledge transfer.
- Active role in the scope of conceptual problem solving.
- Defines over-arching concepts for the entire product area.
- Closely collaborates with partner teams.
- Acts upon RMD Cultural Beliefs.

Must Haves

- Min. Bachelor's degree in Computer Science or Information Technology
- Min. 5-7 years of experience as Senior in Software Engineer
- Proficient in C#.Net, experience in Docker and with Linux
