

# DevOps & Infrastructure Engineer (m/f/d)

Temporär      Jobregion: Rotkreuz      Stellenprozent: 80 - 100%

## Beschreibung

As a first-tier supplier to our renowned business partner **Roche Diagnostics in Rotkreuz**, we are currently looking for a motivated and dedicated **DevOps & Infrastructure Engineer** for a temporary assignment of 12 months, with high probability of extension.

The company features a specialized team of Linux SW and HW Experts providing a Debian-based Roche Linux distribution along with know-how, expertise, and support to various Roche medical devices. The company is currently looking for an experienced DevOps & Infrastructure Engineer to strengthen the team. The ideal candidate is excited about new technologies and loves challenges. In this role, the candidate will be a core contributor and consultant, ensuring the Roche Linux platform is robust, secure, and perfectly tailored to the demanding world of MedTech.

The perfect candidate is an Infrastructure Engineer with 8+ years of experience building and managing scalable infrastructure and user-facing services. They have strong collaboration skills, work effectively with software developers and solution engineers, and can communicate complex technical concepts to diverse audiences. A degree in Computer Science, Software Engineering, or a related field is required. English fluency is essential, German is a plus.

## Tasks & Responsibilities

- Contribute to RLX infrastructure from all the way to hardware and physical network to building and maintaining on-premises HA clusters with all their infrastructure services
- Select, order, assemble and integrate hardware for the infrastructure
- Contribute to the RLX hardware in the loop testing infrastructure
- Create and operate the platform for high level services (build servers, ci runners, artifact repositories)
- Integrate the infrastructure with external dependencies (compute, storage, network provided by the company and facilities available on site, and also with service dependencies, such as GitLab, GitHub, Artifactory, Slack)
- Create declarative infrastructure as code solution for infrastructure management
- Build and maintain monitoring, alerting and inventory management services
- Provide a platform for developer self service, that allows devs to experiment or solution engineers to take over a hardware in a loop device for debugging and testing

KWI-IT-T-53636

**Jobregion**  
Rotkreuz

- Design a lifecycle management solution for the infrastructure and the hardware in the loop hardware components
- Design, implement, test and maintain the backup, emergency and disaster recovery procedures for the infrastructure and the services
- Manage the cloud infrastructure
- Integrate cloud and on premises infrastructure and services
- Design, build and maintain pipelines (GitHub)

## Must-Haves

- 8+ years of professional experience in Software Engineering, Infrastructure Engineering, Site Reliability Engineering (SRE), DevOps, or a related field
- Bachelor's or Master's degree in Computer Science, Software Engineering, Information Technology, or a related engineering discipline
- Proven track record of designing, building, and operating infrastructure platforms from the ground up, including user-facing services and production environments
- Strong understanding of infrastructure architecture, reliability, security, and operational excellence
- Experience collaborating closely with Software Engineers, Solution Architects, Product and Platform teams, and customer-facing technical stakeholders
- Demonstrated ability to lead technical initiatives, drive infrastructure improvements, and influence engineering best practices
- Strong problem-solving skills with the ability to work independently in fast-paced environments
- Excellent verbal and written communication skills, with the ability to explain complex technical concepts to both technical and non-technical audiences
- Professional proficiency in English (written and spoken)

## Nice-to-Haves

- Experience in Virtualization / Container technologies, Kubernetes, CI/CD pipelines
- Experience with cloud providers (e.g. AWS) and IaC (e.g. Terraform)
- Experience in Embedded Software, Hardware Drivers, ARM Platform, hardware / software integration
- German language skills are a plus, but not required

## Benefits

- Become part of one of the most prestigious pharmaceutical companies and actively shape the future of healthcare
- Experience a work culture that promotes diversity and inclusion and where all employees feel valued
- Work on a state-of-the-art campus featuring green spaces, meeting areas, and an inspiring atmosphere
- Work with modern and up-to-date tools in an innovative work environment
- Start with a professional onboarding process and a thorough introduction to your new role during the Welcome Days
- Benefit from financial support for your professional development plans

- Enjoy a selection of high-quality meals in modern staff restaurants
- As part of a sustainable mobility concept, on-site parking spaces are available to you (subject to eligibility criteria)
- Take advantage of unbeatable, year-round discounts at renowned retailers and over 200 top brands
- Benefit from fleet discounts when purchasing new cars or receive constant fuel discounts with our fuel card
