

Fullstack Web Software Engineer (m/w/d)

Fest - Vollzeit Jobregion: Zürich Stellenprozent: 100%

Beschreibung

For our partner, a well-known company based in Zurich, we are looking for an analytical and customer-oriented **Fullstack Web Software Engineer**.

Tasks

- Architecture, design and realization according to agile approach
- Designing and implementing Restful Services
- Improvement of the software architecture and ensure its quality
- Creating and finding innovative solutions
- You will be part of a multinational Team which is made of highly skilled professionals with deep know-how in software development
- You will help drive the Web Editor in a cross-functional scrum team to deliver new features on continuous base using agile methodology
- Thinking outside the box and developing practical solutions to real business challenges

Must Haves

- You are passionate about software craftsmanship
- You love learning, developing yourself as well as developing and coaching others
- You enjoy collaborating with product managers, designers and other engineers to build great solutions to customer problems
- You care about your applications and services and you build them as if you were going to use them
- Strong experience in web development (**.NET / C#**) in front- and backend
- Very good knowledge of web technologies such as **.Net Core, Angular** and a good knowledge of **MS-SQL**
- Your colleagues can count on you because you are important. And you should be uncomplicated and have a good sense of humor.
- Fluent English is needed, German would be a big plus
