Manufacturing Process Engineer (m/f/d)

Temporär Jobregion: Rotkreuz Stellenprozente: 100%

Beschreibung

As a first-tier supplier to our renowned business partner **Roche Diagnostics in Rotkreuz**, we are currently looking for a motivated and dedicated **Manufacturing Process Engineer** for a temporary assignment of 1 year, with high probability of extension.

Tasks & Responsibilities

- Identify & Solve Gaps: Analyze production processes to uncover limitations, root causes, and risks in process robustness, control strategy, and equipment
- Drive Improvements: Develop and implement actionable solutions—ranging from digital tools and new technologies to equipment upgrades and workflow enhancements
- Control Strategies & Data: Monitor production KPIs, detect early deviations using control loops, and implement impactful in-process quality controls
- Testing & Ramp-up: Plan and execute Design of Experiments (DoE) across lab and manufacturing environments, supporting the scale-up of new production lines
- Shop-Floor Collaboration: Partner closely with shop-floor teams, technicians, and cross-functional stakeholders to align practical reality with engineering solutions
- Compliance & Documentation: Create and maintain robust process documentation, change records, and work instructions in line with GxP standards

Must Haves

- You bring educational background in Engineering (Mechanical, Mechatronics, Automation, Electrical, Micro/Precision Engineering), Physics, Materials Science, or equivalent practical experience
- You bring technical experience and a practical background in complex automated production, robotics, high-precision assembly, dispensing, joining technologies, or delicate component handling
- You bring industry experience across various sectors (e.g., medical devices, semiconductors, precision mechanics, automotive, watchmaking, or machinery); experience in regulated environments is a plus
- You bring a shop-floor and GxP mindset: pragmatic and approachable on the production floor, with a clear commitment to structured technical documentation within a GxP environment (training provided)
- You bring data and digital skills, including practical ability in at least

one programming language (e.g., Python, R) or working with modern digital tools/AI workflows
- You bring strong interpersonal and collaboration skills, with an open-minded approach to engage seamlessly with shop-floor technicians, ask probing questions, and clearly convey analytical insights to cross-functional lead engineers
- You bring an agile mindset, with experience or enthusiasm for agile frameworks (Scrum, Kanban, PI planning) and cross-functional collaboration.
- You bring professional fluency in English and German at B2 level or higher.
- Hepatitis vaccination required for laboratory and clean production access.

Nice to Haves

- Familiarity with continuous improvement / Lean Six Sigma methods (SIPOC, value stream mapping, root-cause toolkits).
- Experience in advanced statistical analysis, database queries (SQL, Snowflake), or digital manufacturing projects.

Benefits

- Become part of one of the most prestigious pharmaceutical companies and actively shape the future of healthcare
- Experience a work culture that promotes diversity and inclusion and where all employees feel valued
- Work on a state-of-the-art campus featuring green spaces, meeting areas, and an inspiring atmosphere
- Work with modern and up-to-date tools in an innovative work environment
- Start with a professional onboarding process and a thorough introduction to your new role during the Welcome Days
- Benefit from financial support for your professional development plans
- Enjoy a selection of high-quality meals in modern staff restaurants
- As part of a sustainable mobility concept, on-site parking spaces are available to you (subject to eligibility criteria)
- Take advantage of unbeatable, year-round discounts at renowned retailers and over 200 top brands
- Benefit from fleet discounts when purchasing new cars or receive constant fuel discounts with our fuel card
