

Product Quality Engineer (m/f/d)

Temporär Jobregion: Rotkreuz Stellenprozenzte: 100%

Beschreibung

As a first-tier supplier to our renowned business partner **Roche Diagnostics in Rotkreuz**, we are currently looking for a motivated and dedicated **Product Quality Engineer** for a temporary assignment of 12 months, with high probability of extension.

External Manufacturing is the competence center at Roche for parts and products in the diagnostic workflow, manufactured by external suppliers. This includes the development of new products, product care activities, the assurance of supply as well as the supplier selection and maintenance in close collaboration with Procurement. As a Product Quality Engineer, the role holder is responsible for the planning and state-of-the-art measurement of the technical test specifications. This role assures that the products are tested compliant to the regulations, including statistical sampling plans and test procedures. The Product Quality Engineer provides the necessary training of test procedures to chapter members and stakeholders outside of the organization.

Tasks & Responsibilities

- Transfer product specification into test equipment requirements (URS)
- Define and develop test equipment
- Define acceptance criteria for test equipment
- Accountable for creation of test plan
- Implementation of test planning at supplier and RDI
- Define sample size for in-process control (IPC), product release testing, and incoming goods inspection
- Conduct internal and supplier trainings regarding product quality inspection
- Accountable for test equipment qualification, test method validation, including correlation studies to RDI test equipment
- Technical Q&V documentation review at supplier regarding test equipment qualification, test method validation
- Responsible for review of first article inspection (FAI) incl. verification of the tolerance situation
- Technical assessment of changes of test equipment and test planning

Must Haves

- M.Sc. or B.Sc. degree in Engineering, Natural Science, or related disciplines, or an apprenticeship with a high degree of subject matter expertise
- 3+ years of relevant work experience in a GMP-regulated, producing
