Scientist Lab Technician Assay Development (m/f/d)

Temporär Jobregion: Rotkreuz Stellenprozente: 100%

Beschreibung

As a first-tier supplier to our renowned business partner Roche Diagnostics in Rotkreuz, we are currently looking for a motivated and dedicated **Scientist Lab Technician Assay Development** for a temporary assignment of 12 months, with high probability of extension.

The Assay Development team is responsible for the development of molecular diagnostic and screening tests based
on PCR technology in the areas of infectious diseases, genomics, and oncology, from early feasibility to commercial
launch. Our main areas of responsibility include initial prototyping; optimization of assay design to meet product
requirements and ensure manufacturability; development of test methods and acceptance criteria; transfer of reagent
manufacturing instructions, test methods, and workflows to Operations; the design and execution of verification and
validation activities, including guard-band studies, stability studies, and technical performance verification studies;
and documentation of analytical performance for product labeling and regulatory submission packages. Throughout
the product development phases, Assay Development interfaces with various departments including Research,
Operations, Quality, Regulatory, and Business in order to create and realize what patients need next.

Tasks & Responsibilities

- You work with high-throughput lab analyzers.
- You perform routine lab work with infectious samples and lead your own experiments, including their analysis.
- You plan and execute various work packages for the development of molecular diagnostic tests.
- You participate in project meetings and present experimental data.
- You ensure precise documentation of experiments using electronic lab journals according to GMP standards.
- You handle and maintain laboratory equipment.
- You perform statistical data analysis using various software and tools (e.g., JMP).
- You author official documents (e.g., Design History Files).

Must Haves

- Graduate as Biomedical Analyst Scientist (BMA HF) or apprenticeship
