

Senior C# Software Developer

Temporär Jobregion: Rotkreuz Stellenprozenze: 100%

Beschreibung

For our international medical partner, Roche Diagnostics Int Ltd based in Rotkreuz, we are looking for a qualified and motivated **Senior C# Software Developer** for one year with option for extension.

The core mission of our department is the development of software for PCR (polymerase chain reaction) instruments. In addition, we develop connected services and tools within that ecosystem. The department is looking for an experienced Developer to support one of our SAFe/SCRUM teams in Software Instrument development.

Tasks

- Produces software based on software requirements, the project's software architecture, and other project guidelines
- Contributes to all phases of software development from feasibility studies through design, development, testing, and bug fixing including software maintenance
- Provides work status and issue notification within the software development team and if required to software project management
- Participates in defining work packages, their estimation, planning, and implementation within the software development team
- Accurate code design and implementation including the tests to verify the code against the unit and/or subsystem specifications
- Review on request for the source code of your peers in the software development team
- Review and analysis of your source code with your peers
- Reviews the application design, functionality, usability, and performance to enhance it
- Ability to work through ambiguity and make progress
- Takes responsibility for quality and project delivery targets
- Ability to collaborate and communicate effectively within and outside the team
- Leadership attitude in shaping the product together with the team
