

Software Development Engineer (m/f/d)

Temporär Jobregion: Rotkreuz Stellenprozenzte: 100%

Beschreibung

For our international medical partner, **Roche Diagnostics Int Ltd** based in Rotkreuz, we are looking for a qualified and motivated **Software Development Engineer** for a long term position.

Roche Diagnostics has assembled a team to deliver a project where you will be working on a cloud native solution to support healthcare professionals in clinical decision making.

You will be closely working with a team including software developers, UX/UI and medical specialists where you will have a say in the decisions the team needs to take. With the team you will be building the solution by transforming decisions, plans and designs into an actual product, using various technologies and tools. You will also raise concerns whenever you see them.

Tasks

- Participate in all phases of software development from design to development, testing, bug fixing all the way to deployment
- Participate in defining work packages, estimations, plans and implementation within the development team
- Execute the assigned work packages correctly, completely and in a timely manner
- Provide all necessary documentation according to the software development process
- Review application design, functionality, usability and performance to enhance it
- As a team member, actively contribute to sprint goals and continuous improvement

Must Haves

- Bachelor's degree in Computer Science or similar from software sector
- 5+ years in software development with knowledge of agile software development and continuous integration and deployment
- 5+ years .NET C# .NET Core, ASP.NET Core Web API
- Experienced in JavaScript/TypeScript, CSS, HTML
- Knowledge of JavaScript frameworks for front-end like React, Vue,
