

Software Engineer Rust (m/f/d)

Temporär Jobregion: Rotkreuz Stellenprozent: 100%

Beschreibung

As a first-tier supplier to our renowned business partner **Roche Diagnostics in Rotkreuz**, we are currently looking for a motivated and dedicated **Software Engineer Rust** for a temporary assignment of 12 months, with high probability of extension.

As a Software Engineer working in Rust, you will be part of a cross-functional team, playing a pivotal role in designing, developing, and maintaining software solutions. This position enables the Molecular Lab network to deliver accurate and timely diagnostic solutions, empowering customers to make a real impact in patient care.

The perfect candidate has proven experience in software development with a demonstrated passion and hands-on professional experience working with Rust. Furthermore, Roche is looking for a professional highly skilled in communication, promoting diversity and inclusion, and facilitating seamless collaboration across organizational boundaries.

Tasks & Responsibilities

- Develop and maintain software solutions by applying in-depth technical knowledge and problem-solving skills, while ensuring compliance with regulatory standards for medical software.
- Ensure the timely delivery of high-quality software for medical devices that meets both company standards and customer needs.
- Communicate complex technical concepts effectively, fostering an environment of collaboration and continuous learning within diverse and intercultural teams.
- Empower team members to take ownership of their work and lead by example to foster teamwork and mentorship.

Must-Haves

- Bachelor's degree or equivalent practical experience in a specialized field related to software development or engineering.
- Several years of proven experience in software development, with at least two years of hands-on professional experience in Rust. This includes a solid understanding of Rust's core concepts (ownership, borrowing, lifetimes), asynchronous programming (e.g., `async/await`), and familiarity with common libraries (e.g., `tokio`, `actix-web`, `rocket`, `serde`, `sqlx`).
- Capability to solve complex issues creatively using a multi-faceted approach based on thorough analysis.
- Hands-on experience with modern system architectures (event-driven, DDD), quality-driven practices (TDD, BDD), or containerization

(Kubernetes) is a plus.

- Excellent communication skills with the ability to foster an inclusive environment and collaborate effectively across teams.
- Ability to lead by example, establish a psychologically safe working environment, and empower team members through ownership.
- English fluency is a MUST, German is a plus.

Nice-to-Haves

- Experience as a Technical Lead within a team.
- Certified ISAQB or equivalent certification.

Benefits

- Work with state-of-the-art tools on a modern campus featuring green spaces and an inspiring atmosphere.
- Experience a work culture that promotes diversity and inclusion, where everyone feels valued.
- Benefit from financial support for your professional development and further education.
- Take advantage of unbeatable, year-round discounts with renowned retailers, over 200 top brands, as well as fleet discounts on new car purchases and consistent fuel discounts.
- Become part of one of the most renowned pharmaceutical companies and actively help shape the future of healthcare.
- Enjoy a selection of high-quality meals in modern staff restaurants.
- Where applicable, benefit from on-site parking as part of a sustainable mobility concept.
- Start with professional onboarding and a thorough introduction to your new role during the Welcome Days.
- We offer you a long-term position and diverse development opportunities within the company.
