

UX Designer (m/f/d)

Temporär Jobregion: Rotkreuz Stellenprozenze: 100%

Beschreibung

For our international partner, Roche Diagnostics International Ltd. based in Rotkreuz, we are looking for a qualified and motivated **UX Designer** for 6 months with option for extension.

At CXSD you will join an international group of designers to bring the voice of customers to the core of Roche Diagnostics decisions by designing and enabling a seamless experience across our portfolio of products and services. You'll be part of building design maturity for Roche with peers who are passionate, energetic and caring in a connected, multicultural, highly motivated team.

Tasks

- Be the voice of Roche users, customers and patients in every product conversation
- Support UX research along the project process to provide fact-based inputs (e.g. user interviews, desk research, surveys) and create user and customer journeys.
- Participate in (virtual) workshops with the business and engineering teams to gather system-level information and to coordinate the design deliverables
- Translate user research and business requirements into user and customer journeys, state of the art user flows and design ideas.
- Design low/high fidelity mockups and interactive prototypes following industry standards and trends.
- Apply with method style and components from the Roche Design System and contribute to its evolution.
- Structure and run usability tests, analyze and present the outcome in the project team.
- Present your design ideas and output to the design team, project stakeholders, CXSD department and document the design activities following Roche internal regulatory process.
- Contribute to CXSD activities to establish UX and CX best practices in the Organization.

Must Haves

- Min. Bachelor in UX design, HCID, visual design, communication, social

or technical science or similar

- Strong vertical in how to research user behavior, derive the most powerful insights from all forms of research, and prototype the creative solutions your actionable insights inspire
- Strong abilities in user centered design process, interaction and visual design
- Min. 2-5 years of experience in the successful application of Design Systems, especially in digital products/solutions in multiple projects and products
- Experienced in planning, organizing (incl. interfacing with recruiting agencies), executing and analyzing formative usability studies
- Fluent in English (spoken and written)
- Proven ability to plan, organize, moderate and analyze (virtual) workshops and co-design sessions with customers and stakeholders
- Contributed to several products or services that have come to market (with ownership of key deliverables).
- Proven experience in guiding more junior designers on projects that require in-depth knowledge of specific domains and skill development (Leadership skills)
- Proven presentation skills and ability to communicate know-how, experiences, ideas, solutions and deliverables effectively and persuasively

Are you interested? Do not hesitate and submit your complete application documents online today.

We value diversity and therefore welcome all applications - regardless of gender, social origin, religion/belief, age or identity.

We also process applications by post, but will not return them for administrative reasons. We look forward to hearing from you!
